Wang, Run R.

Checkpoint 4   Peer-Review Sprint D   15-12-2021

I worked on the Apache Airflow and data pipelines this sprint together with Veronika. I think we made a sufficient progress. We didn't have any knowledge of data pipelines and Apache but we managed to create our first DAG which is doing the main processing tasks(removing empty rows, duplicates, getting needed columns and populating the database). I also worked on the part of detecting new files on every execution of the DAG in the folders, which compares the SHA256 code of all files with the same code from the last execution and if there are different/new codes, these files are new and have to be processed by the other tasks. In the next sprint we are going to finish our work on this. We have to create connect the processing of files with the detection and we will have a whole working data pipeline. I am satisfied with my progress. Read less

Persistently working on the project, has progress, good job this sprint.

Stela seems to work a lot on the backend, also having good connections with the members.

Nice work on the API

Stela and Veronika worked on setting up apache airflow this sprint. Very good work!

Greate job!

Checkpoint 3   Peer-Review Sprint C   24-11-2021

I worked on the implementation of the base classes and files (architecture) and developed the API together with Veronika. I think I did a good job and for sure improved from the last sprint.

Good job with the API

Stala made the API for accessing data in this sprint and having good communication, it's nice to work with her.

Planned progress of back end

Good job on the back-end foundation and API. Keep up the good work!

Stela worked with Veronika on the backend developing the API and constructing the architecture of the project. Nice work!

Good back-end progress

Checkpoint 2   Peer-review Sprint B   03-11-2021

I did much on the documentation and researched some things that were valuable for the project

Doing well the tasks she assigned with

Stela has done alright this sprint. I would like to see some more decisiveness and sleeves-up attitude.

Good documentation progress

Nice work on the documentation for this sprint!

Stela worked a lot on the documentation and came up with a good test plan and social impact report, etc. Maybe it would be better to work a bit more on the implementation in the coming sprints.

Great work on the documentation

Checkpoint 1   Peer Review Sprint 1   06-10-2021

I think I am doing well so far. Did everything that I planned to do for the sprint and contributed to the development of the project.

No feedback has been added

Stela and Veronika are their own pair. They work very well together and are a power duo by themselves. This semester Stela was busy working on the documentation for the project together with Veronika. She is not afraid to speak her mind in team sessions and that is key during critical thinking sessions with the group. Overall a good teammate, glad to be on a team with her. Read less

Good work on the documentation

Stela was working on the planning during this sprint and came up with the sprint demo, nothing to complain about, it's nice to have her in the group.

Stela seems to be good at understanding what the project requirements are.
Stela is quick to understand the concepts required to work on the project. Stela could sometimes be more assertive in her opinions. Read less
